PROFESSIONAL SUMMARY

High-achieving Computer Science and AI student with a passion for low-level systems architecture, algorithm optimization, and scalable software development. Proven track record of delivering high-impact technical solutions, from custom compilers to enterprise-grade database designs. Eager to leverage strong proficiency in Java, Python, and React to drive innovation within Meijer's IT infrastructure, systems deployment, and IT operations teams.

EDUCATION

Grand Valley State University <i>Bachelor of Science in Computer Science & Mathematics; Master of Science in Artificial Intelligence</i> GPA: 3.9 Frederik Meijer Honors College Member	Allendale, MI 2024 – 2028
Oakland Community College <i>Computer Science (Dual Enrollment)</i> GPA: 3.77	2023 – 2025

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, TypeScript, SQL
Technologies: React, NoSQL (Firebase), Agile Methodology, Systems Architecture, IT Operations, Infrastructure Support, Systems Deployment

EXPERIENCE

Blue Nucleus	Junior Developer	Oct 2025 – Present
- Architected frontend features for a social media research platform using React, resulting in a 20% increase in user engagement. - Designed a scalable NoSQL Firebase database, optimizing query latency by 30% and supporting 500+ concurrent active users.		
Konica Minolta, Inc.	Computer Deployment Team Member	Apr 2025 – Aug 2025
- Managed the end-to-end hardware lifecycle for 20,000+ devices, ensuring seamless system configuration and deployment for national school districts. - Executed large-scale IT support processes, including auditing 1,000+ asset tags and resolving data inconsistencies to maintain 100% inventory accuracy. - Streamlined infrastructure support workflows by automating device imaging and deployment protocols.		
Grand Valley State University	College of Computing Mentor	Aug 2025 – Present
Facilitated academic success for computing students by providing personalized guidance and serving as a key ambassador for campus resources and professional development opportunities.		
Grand Valley State University	CIS Tutor	Jan 2025 – Present
Accelerated student learning outcomes in Python and Java by providing targeted debugging support and mentoring on industry-standard coding best practices.		
Oakleypaws	Content Creator	Oct 2020 – Present
Engineered complex technical content regarding low-level computing, achieving 1.1M+ total views by translating intricate logic systems into accessible, high-engagement educational media.		

PROJECTS

5 Bit Computer Emulator | *Python, Custom Assembly*

Designed a full-stack 5-bit computer architecture, utilizing Python for system automation and scripting to manage 2,000+ lines of modular code, demonstrating core principles of systems architecture.

1 Instruction Computer | *Java, Python, Custom Assembly*

Engineered a Java-based compiler and emulator, integrating Python automation scripts to bridge high-level assembly with hardware execution, showcasing practical automation and software-hardware integration.

Memory Sort Algorithm | *Python*

Developed a memory-optimized sorting algorithm achieving $O(n+k)$ runtime, significantly outperforming standard Merge sort for large-scale integer datasets, highlighting advanced algorithm optimization.

AWARDS

- **Finalist in GR Deep Tech Pitch Competition (2026):** Top 4 finalist out of 50 teams for 'PulseGuard Sentinel'.
- **MWC3 Competition Awards (2025-2026):** 3rd Place Java (2026), 1st Place Individual Database (2026), 1st Place Individual Java (2025).
- **2025 IOPCC Winner:** Recognized as one of five global winners for excellence in complex Python code obfuscation.
