Technical Operations: Documentation & Knowledgebase Management, Datadog Monitoring, API Maintenance, AWS Database Migration

Software & Tools: Python, React, Node.js, Microsoft Office Suite, G Suite

EXPERIENCE

Technical Support Specialist | *Freelance/Contract*

2021 – Present

- Acted as the primary point of contact for end-users, diagnosing and resolving hardware and software connectivity issues.
- Maintained and configured desktop environments, ensuring optimal performance for daily user workflows.
- Documented technical solutions in a knowledgebase to streamline future troubleshooting and improve team efficiency.

TECHNICAL PROJECTS

User-Facing Application Deployment | *TypeScript*

Managed the deployment and configuration of a resume optimization tool, actively troubleshooting user-reported bugs and refining system performance based on direct user feedback.

Developer Productivity Utility | *TypeScript*

Developed and maintained a utility to streamline team workflows, focusing on system stability and reducing technical friction during code reviews.

Data Analysis & Reporting | *Python*

Executed data analysis on user engagement datasets, translating complex technical findings into actionable insights for strategic decision-making.
