PROFESSIONAL SUMMARY

Visionary technology executive with 20 years of experience scaling global engineering organizations and driving legacy modernization initiatives. Over 8 years of executive-level technology leadership directing global engineering strategies, managing \$50M+ P&L budgets, and architecting enterprise cloud strategy to accelerate ARR growth. Expert at aligning high-velocity engineering teams with corporate strategy to deliver operational excellence at scale.

EXPERIENCE

Nexus Enterprise Solutions

Seattle, WA

Vice President of Engineering

March 2019 – Present

- Scaled global engineering headcount from 85 to 320+, driving operational excellence across diverse, distributed teams of 320+ engineers and accelerating product delivery velocity by 40% through Agile/SAFe transformation.
- Optimized \$55M annual departmental budget, capturing \$4.1M (22%) in cloud infrastructure savings via strategic AWS architectural refactoring.
- Partnered with the CEO to evaluate technical targets for future acquisitions, directing due diligence and integration for 3 major transactions, successfully migrating 1.2M users with zero unscheduled downtime.
- Modernized legacy infrastructure by decommissioning a 10-year-old monolith in favor of a resilient microservices architecture, achieving 99.99% system availability.

CloudNetics Systems

San Francisco, CA

Director of Cloud Infrastructure

July 2014 – February 2019

- Led a 45-person DevOps and SRE organization to maintain a multi-region hybrid cloud platform supporting Fortune 500 enterprise clients.
- Standardized enterprise-wide containerization via Kubernetes, slashing environment provisioning lead times from 3 weeks to 45 minutes.
- Partnered with C-suite stakeholders to define a 3-year technology roadmap, serving as a primary technical driver for a successful \$120M Series D funding round.

FinServe Analytics

Chicago, IL

Principal Software Architect

January 2009 – June 2014

- Architected a high-frequency trading data pipeline in C++ and Java, processing 2M+ transactions per second with sub-millisecond latency.
- Established the company's inaugural Architecture Review Board (ARB), standardizing design patterns and mentoring 15 senior engineers.

KEY PROJECTS

Enterprise LLM Adoption Initiative | OpenAI Enterprise, Python, AWS SageMaker, React

Executive sponsor for a company-wide AI integration, deploying secure LLM tooling for customer success teams, resulting in a 35% reduction in ticket resolution time and \$2M in annualized headcount savings.

Project Phoenix - Monolith Decommissioning | Go, AWS EKS, Kafka, PostgreSQL

Led the strategic migration of a 12-year-old legacy PHP monolith to 40+ independent Go microservices, ensuring zero-disruption continuity for enterprise clients over an 18-month transformation.

SKILLS

Strategic Planning & Execution, Organizational Design & Scaling, Enterprise Cloud Strategy, P&L & Budget Management, M&A Technical Integration, Agile/SAFe Transformations, Legacy Modernization Initiatives, Microservices & Distributed Systems, Executive Communication.

EDUCATION

University of Washington <i>Executive MBA, Technology Management</i>	Seattle, WA 2016 – 2018
Georgia Institute of Technology <i>Bachelor of Science, Computer Science (Magna Cum Laude)</i>	Atlanta, GA 2000 – 2004

AWARDS & PUBLICATIONS

Top 50 Women in Tech Leadership, Pacific Northwest Technology Council (2022)
Bridging the Gap: How Engineering Leaders Can Speak the Language of the Boardroom, Forbes Technology Council (2023)
Keynote: Architecting for Hyper-Growth, AWS re:Invent (2021)
